### **DETAILED ACTION**

The amendment filed October 13, 2004 canceling claim 37, amending claims 6, 35 and 36 and adding claims 38-41 has been entered.

Claims 6, 34-36 and 38-41 are pending.

The indicated allowability of claim 34 is withdrawn in view of the newly discovered reference(s) to Yue et al. Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 6, 34-36 and 38-41 are rejected under 35 U.S.C. 102(e) as being anticipated by Yue et al.

Art Unit: 1652

Yue et al. (US Patent Application Publication 2004/0077044 of pending application 10/433,794, International Filing Date 12/4/01) teach human phosphatase of SEQ ID NO: 3 (459 amino acid residues, claims 1, 2 and 58) that is 100% identical to SEQ ID NO: 8 of the instant invention. This sequence is disclosed in provisional application 60/255,756 filed December 14, 2000 (SEQ ID NO:1) to which application 10/433,794 claims priority.

As stated in the Office action mailed July 16, 2004 (page 6), SEQ ID NO:8 does not get the priority date of provisional application 60/208,291 and therefore, has the priority date as of the filing date of instant application, i.e. May 30, 2001. Thus, the phosphatase of SEQ ID NO:3 taught by Yue et al. anticipates claims 6, 34-36 and 38-41.
